Hudhud was a strong tropical cyclone that caused extensive damage to the city of Visakhapatnam and the neighbouring districts of Vizianagaram and Srikakulam of Andhra Pradesh on 12<sup>th</sup> October 2014(Sunday). Damages are estimated to be at least 70000 crore (US\$11 billion), with assessments still underway. It tore through the Steel City, unleashing widespread destruction and bringing the otherwise bustling city of nearly 20 lakh people to a grinding halt. The damage caused by Hudhud not only changed the landscape of the Port City, but also made it the first city in the country to be directly hit by a cyclone since 1891 as per the records of the IMD. Under the impact of Hudhud that made a landfall on Sunday, accompanied by gusty winds and heavy rains, the City of Destiny looked like a war-ravaged zone with lakhs of uprooted trees, knocked down cell towers, transformers, and telephone poles lying strewn at several places. Essential services were disrupted and people remained indoors to escape nature's fury. However, before Hudhud approached the shores, the government machineries at the centre and the state had pooled their resources together to warn people, arrange evacuation, and deploy rapid action teams. As a result of such preemptive measures, number of deaths remained at less than 50.
