IIFT Admission Test For Programme 2016-18

2015 QUESTION PAPER

SECTION - 1

- **1.** Which multilateral development bank has been set up by BRICS as an alternative to the World Bank and the International Monetary Fund?
 - A) The New Development Bank

B) The Asian Development Bank

C) The Bank for Emerging Nations

D) The Economic Cooperation Bank

2. Given below are some popular stock indices of the world. Match the stock index with the country and stock marker it represents

	Stock Index	Stock Market		
I.	DAX	a.	Japan	
II.	Nikkei	b.	Brazil	
III.	KOSPI	c.	Germany	
IV.	Bovespa	d.	South Korea	

A) I-d; II-b; III-a; IV-c

B) I-b; II-d; III-c; IV-a

C) I-a; II-c; III-b; IV-d

D) I-c; II-a; III-d; IV-b

3. The remains of which ancient civilisation can be seen at the site of Machu Pichu in Peru?

A) Incas

B) Aztecs

C) Mayans

D) Indians

4. Who is acknowledged as the creator of Chandigarh's Rock Garden?

A) E. Sreedharan

B) Nek Chand Saini

C) Charles Correa

D) Geoffrey Bawa

5. Which is the first Eurozone nation to exit its bailout package?

A) Portugal

B) Italy

C) Ireland

D) Spain

6. Match the name of the city with the river on whose banks it is located

	City		River
I.	Budapest	a.	Tigtis
II.	Baghdad	b.	Tiber
III.	Rome	c.	Han
IV.	Seoul	d.	Danuble

A) I-d; II-a; III-b; IV-c

B) I-b; II-c; III-d; IV-a

C) I-c; II-d; III-a; IV-b

D) I-a; II-b; III-c; IV-d

What is the motto of the 2016 Summer Olympics to be held in Rio de Janeiro?

7.

	A) Live Your Passion			B) One V	B) One World, One Dream		
	C) Friend	ls Forever		D) Harmo	D) Harmony and Progress		
8.	Which fil	lm won the 2015 Oscar	Award 1	for the "Best Animate	ed Feature Film	"?	
	A) Song	of the Sea		B) How t	B) How to train your Dragon 2		
	C) Big H	ero 6		D) The B	oxtrolls		
9.	Who among the following has won the maximum all t				l time Grand Slam Women's Singles titles?		
	A) Seren	a Williams		B) Marga	ret Court		
	C) Steffi	Graf		D) Martio	ona Navratilova		
10.	Match the as CEO.	e name of the Multination	onal Fir	m with whom the fo	llowing Indians	are/have been associated	
	Indian CEO Multinational Firm						
	I.	Anshu Jain	a.	Master Card			
	II.	Shantanu Naratyen	b.	Reckitt & Colman			
	III.	Ajaypal Singh Banga	c.	Deutsche Bank			
	IV.	Rakesh Kapoor	d.	Adobe		6.7	
<	A) I-c; II-d; III-a; IV-b B) I-b; II-a; III-c; IV-a						
	C) I-d; II	-c; III-b IV-a		D) I-a; II	-b; III-d; IV-c	ð. °	
11.	A person	with 'AB' blood group i	s also c	called a universal rec	ipient because o	f the	
	A) Lack	of antigens in the blood		×			
	B) Lack	of antibodies in the bloo	d	.63.			
	C) Lack	of both antigens and anti	bodies	in the blood			
	D) Presei	nce of both antigens and	antibo	dies in the blood			
12.	Who is th	ne Vice Chairman of the	NITI A	Aayog?			
	A) Arvin	d Pangariya		B) Arun 1	Maira		
	C) Raghu	ıram Rajan		D) Arvino	d Subramaniam		
13.	The first	Export Processing Zone	of Asia	a was set up in			
<	A) Singa	pore B) Kar	ndla	C) Shang	hai	D) Dubai	
14.	Who laur	nched a 'crowd funding'	campai	gn to raise funds for	bailing out Gree	ece?	
	A) Thom	as Feeney		B) Thoma	as Friedman		
	C) Thom	son Reuters		D) Thom	as Edison		
		www.	een	adupratib	ha.net		

15. Match the name of the book with its author.

16.

17.

18.

19.

20.

21.

	Book		Author
I.	To Kill a Mockingbird	a.	E.M. Forster
II.	A Passage to India	b.	Joseph E. Stiglitz
III.	Globalisation and its Discontents	c.	Thomas L. Friedman
IV.	The World is Flat	d.	Harper Lee

	Book			Author		
	I.	To Kill a Mockingbird	a.	E.M. Forster	X,	
	II.	A Passage to India	b.	Joseph E. Stiglitz	V6.	
	III.	Globalisation and its Discontents	c.	Thomas L. Friedman	\ \ \ \ \ \ \ \ \ \ \ \ \ \ \ \ \ \ \	
	IV.	The World is Flat	d.	Harper Lee		
A) I-a; II-b; III-d; IV-c				d; II-a; III-b; IV-c		
C) I-	d; II-c;	III-a; IV-b	D) I-	a; II-d; III-c; IV-b		
The	The US recently announced that its redesigned ten-dollar bill, to be issued in 2020, will include the					
A) F	A) Face of a Lion B) Face of an Elephant					
C) F	ace of a	a Woman	D) Fa	ace of a Dragon		
The new Centre-State tax sharing model promised a 10% increase in the State's share				share. This 10%		
incre	increase will result from increasing the share from					
A) 3	2% to 4	12%	B) 22	2% to 32%		
C) 4	2% to 5	22%	D) None of the above			
Whi	ch of th	e following countries is not a member	of Eur	opean Union?	00	
A) S	weden	B) Finland	C) N	orway D) De	nmark	
As p	er the r	monetary policy agreement between R	BI and	the Finance Ministry, the	RBI is required to	
main	ntain inf	lation in the range of				
A) 2	% to 69	% B) 4% to 10%	C) 39	% to 9% D) 5%	to 8%	
Who	discov	ered "Pluto' in the year 1930?	, O,	•		
A) C	Clyde To	ombaugh	B) Albert Einstein			
C) Carl Sagan		D) Jacques Cousteau				
According to the World Investment Report 2015			5 published by UNCTAD, which of the following			
coun	itries wa	as the largest recipient of FDI inflows	in 2014	4?		
A) C	China	B) India	C) U	SA D) Sin	ngapore	
Euro	dollars	are				
A) A	A) A currency issued by European Union					

22. Eur

- B) Special currency issued by the Federal Government of USA for Europe
- C) US dollars held in Europe
- D) European currencies exchanged for the US dollar in US

23. Match the Prime Ministers and President of India who have been contemporaries in Office

	Prime Minister		President
I.	Indira Gandhi	a.	Shankar Dayal Sharma
II.	Rajiv Gandhi	b.	V.V. Giri
III.	I.K. Gujral	c.	A.P.J. Abdul Kalam
IV.	Manmohan Singh	d.	Giani Zail Singh

A) I-a; II-b; III-c; IV-d

B) I-b; II-a; III-d; IV-c

C) I-a; II-c; III-b; IV-d

D) I-b; II-d; III-a; IV-c

24. Mark the wrong combination

A) James Watt: Steam Engine

B) A.G. Bell: Telephone

C) J.L. Baird: Television

D) J. Perkins: Penicillin

25. Mother Teresa was born in

A) Switzerland

B) India

C) Germany

D) Macedonia

ne^t

26. In 1985-86, an official policy introduced Gorbachev in Soviet Union that stressed on honest discussion about the country's social issues and concerns was called

A) Glasnost

B) Gosplans

C) Irredentism

D) Oligarchs

27. The British cosmologist Stephen Hawking and the Russian entrepreneur Yuri Milner have launched a project to search for the extra-terrestrial life. This project is called

A) The Breakthrouh Listen Project

B) The Cosmic Breakthrough Project

C) The Extra Terrestrial Project

D) The Edge of the Universe Project

28. Match the name of the organisation with the name of the city in which it sis headquartered.

	Organization		Headquarters
I.	International Monetary Fund	a.	Lausanne
II.	International Olympic Committee	b.	Geneva
III.	International Labour Organisation	c.	Washington
IV.	International Chamber of Commerce	d.	Paris

A) I-d, II-c; III-a; IV-b

B) I-a; II-b; III-d; IV-c

C) I-c; II-a; III-b; IV-d

D) I-b; II-d; III-c; IV-a

SECTION-2

29. The internal evaluation for Economics course in an Engineering programme is based on the score of four quizzes. Rahul has secured 70, 90 and 80 in the first three quizzes. The fourth quiz has ten True-False type questions, each carrying 10 marks. What is the probability that Rahul's average internal marks for the Economics course is more than 80, given that he decides to guess randomly on the final quiz?

A) 12 / 1024

B) 11 / 1024

C) 11 / 256

D) 12 / 256

30.	In 2004, Rohini was thrice as old as her brother Arvind. In 2014, Rohini was only six years older than her brother. In which year was Rohini born?				
	A) 1984	B) 1986	C) 1995	D) 2000	
31.	If p, q and r are three une then p : q : r is equal to	qual numbers such that p,	q and r are in A.P., and p,	q:r-q and q-p are in G.P.,	
	A) 1:2:3	B) 2:3:4	C) 3:2:1	D) 1:3:4	
32.	If $\log_{25} 5 = a$ and $\log_{25} 1$	15 = b, then the value of 1	og ₂₅ 27 is	2.	
	A) $3(b + a)$	B) $3(1 - b - a)$	C) $3(a + b - 1)$	D) $3(1 - b + a)$

47.	A ladder of 7.6 m long is	s standing against a wall	and the difference between	en the wall and the base of foot of the ladder shifts by
	A) 0.4 m	B) 0.6 m	C) 0.8 m	D) 1.2 m
48.	The value of x for which	the equation $\sqrt{4x-9}$	$+\sqrt{4x+9} = 5 + \sqrt{7} \text{ will}$	be satisfied, is
	A) 1	B) 2	C) 3	D) 4
49.	A) 1 The simplest value of the A) 4	e expression $\begin{cases} \frac{4^{p+\frac{1}{4}} \times 2}{2 \times \sqrt{1}} \end{cases}$	$\frac{\sqrt{2\times2^{p}}}{2^{-p}}$ is	3.
	A) 4	B) 8	C) 4 ^p	D) 8 ^p
50.	In a reputed engineering	college in Delhi, studen	ts are evaluated based on	trimesters. The probability
				ot fail in the first trimester,
	the probability that he is	s promoted to the secon	d year is 0.87. The proba	bility that the student will
		41 . E . 45		

complete the first year in the Engineering college is approximately

A) 0.8

B) 0.6

C) 0.4

D) 0.7

SECTION - 3

Directions (Qs. 51 - 55): Solve these questions based on the information provided in the passage below

Six engineers Anthony, Brad, Carla, Dinesh, Evan and Frank are offered jobs at six different locations - England, Germany, India, Australia, Singapore and UAE. The jobs offered are in six different branches, and are based on their competence as well as preference. The branches are IT, Mechanical, Chemical, Electronics, Metallurgy and electrical, though not necessarily in the same order. Their placements are subject to the following conditions.

- i. The engineer in the Electrical Department is not placed in Germany.
- ii. Anthony is placed in singapore while Dinesh in UAE.
- iii. Frank is not in the Metallurgy Department but Brad is in the Chemical Department.
- iv. Evan is placed in the Mechanical Department while Frank is offered a job in Australia.
- v. The only department offering jobs in India is the Chemical Department while there are no vacancies for IT in Singapore.
- vi. Anthony is interested in IT and Electrical Department while Frank is interested in IT and Mechanical Department. Both of them settle for the options available based on their interests in the locations allotted to them.
- vii. In recent years, UAE has emerged as a hub for metallurgy exports and thus recruitment is done for the same while all mechanical posts are in England.
- Who joined the Electronics Department? 51.

A) Dinesh

B) Anthony

C) Carla

D) Brad

52. The person placed in UAE is in the Department.

A) Electronics

B) Mechanical

C) Metallurgy

D) Chemical

www.eenadupratibha.net **53.** Out of the following, which is the correct combination? A) Anthony-Germany-Electrical B) Brad-India-Chemical D) Frank-Australia-Metallurgy C) Evan-England-Electronics 54. Who joined the IT Department in Australia? A) Frank B) Carla C) Evan D) Brad Which combination is true for Dinesh? 55. A) India-Electrical B) UAE-Electronics D) UAE-Metallurgy C) England-Metallurgy **56.** Based on the given statement choose the right conclusion ' If the breakfast doesn't have eggs, I will not go for a walk and will not have lunch.' A) If I went for a walk and didn't have lunch, the breakfast had eggs. B) If I went for a walk or I have lunch, the breakfast had eggs. C) If I went for a walk and have lunch, the breakfast had eggs. D) If I didn't go for a walk and have lunch, the breakfast had eggs. Direction (Qs. 57 - 60): Read the details below and answer these questions. Due to astrological reasons, a mother named all her daughters with the alphabet 'K' as Kamla, Kamlesh, Kriti, Kripa, Kranti and Kalpana. i. Kamala is not the tallest while Kripa is not the most qualified ii. The shortest is the most qualified amongst them all. iii. Kalpana is more qualified than Kriti. iv. Kamla is less qualified than Kamlesh but is taller than Kamlesh. v. Kalpana is shorter than Kriti but taller than Kranti. vi. Kriti is more qualified than Kamla while Kamlesh is taller than Kriti. vii. Kripa is the least qualified amongst the daughters. Who is the third tallest starting in decreasing order of height? 57. A) Kamla B) Kamlesh C) Kriti D) Kranti **58.** Who is the most qualified? B) Kriti A) Kamlesh C) Kripa D) Kranti 59. What is the rank of Kriti in increasing order of qualification? B) 3 D) 4 A) 2 60. What is the rank of Kamla in increasing order of height? A) 3 B) 5 D) 2

C) 341

D) 250

Based on the number series given, fill in the missing number.

B) 314

18, 37, 76, 155, ____ , 633, 1272

61.

A) 322

Directions (Qs. 62-64): Based on the conditions stated in the passage below, answer the questions that follow.

There are three countries, USA, UAE and UK. An exporter can select one country or two countries or all the three countries subject to the conditions below:

Condition 1: Both USA and UAE have to be selected.

Condition 2: Either USA or UK, but not both have to be selected.

Condition 3: UAE can be selected only if UK has been selected.

62. How many countries can be selected if no condition 1?

A) 6

B) 4

C) 7

D) 8

63. How many countries can be selected to meet only condition 1?

B) 2

D) 3

How many countries can be selected to meet only conditions 2 and 3? 64.

A)0

B) 2 or 1

C) 0 or 1

D) None of these

Based on the following relations, which of the given options indicates that W is the niece of X? **65.**

A + B means that A is the brother of B.

A * B means that A is the father of B.

A - B means that A is the sister of B.

A) x + Y + Z - W

Alex walks 1 mile towards East and then he turns towards South and walks further 5 miles. After that he turns East and walks 2 miles further. Finally he turns to his North and walks 9 miles. How far is he from the starting point?

A) 25 miles

B) 2 miles

C) 5 miles

D) 4 miles

From the given statements, choose the conclusion which follow logically **67.**

Statements:

i. Some iPhones are mobiles

ii. Some mobiles are iPads

ii. Some iPads are tablets

Conclusions:

I. Some tablets are iPhones

II. Some mobiles are tablets

III. All iPhones are tablets

A) Only I & II follow

B) Only I, II & III follow

C) Only II & III follow

D) None of these

Directions (Qs. 68 to 70): Read the passage below and answer these questions.

Export cargo of a trader can give through seven cities P, Q, R S, T, U and V. The following cities have a two-ways connection i.e., Cargo can move in both directions between them; S and U, P and Q, Q and R, V and T, R and T, V and U. Cargo can move only in one direction from U to Q.

- **68,** If the trader wants the cargo the move from City S to City T the excluding cities S and T, what is the minimum number of cities that the cargo has to cross in transit?
 - A) 4

B) 3

C) 2

- D) 5
- **69.** If the trader wants the cargo to City U form City P through the long route, how many cities will be required to cross (excluding cities P and U)?
 - A) 2

B) 4

C) 3

- D) 5
- **70.** To move cargo from City P to City U, which of the following statements will minimise the number of cities to be crossed in transit?
 - A) Connect cities U to R with a two way connection
 - B) Connect cities P to S with a one way connection from cities S to P
 - C) Connect cities U to Q with a two way connection
 - D) Connect cities R to V with a tow way connection

Directions (Qs. 71 to 75): Read the following information and tables and answer these questions.

Torrent Enterprises sells air conditions of Eagle Brand in the retail market of Delhi. The month-wise total number of Window Air Conditioner (WAC) units sold by Torrent during April 2014 to March 2015 are shown below in Table A. Table B shows the share of different types of WACs in total monthly sales for the said period.

Number of Units Sold by Torrent Enterprises during the Period April 14 to March 15

$\langle V V \rangle_A$		Ta	able A			
Month	Units Sold	Month	Units	Sold	Month	Units Sold
Apr-14	1266	Aug-14	12	96	Dec-14	1300
May-14	1268	Spt-14	12	96	Jan-15	1330
June-14	1272	Oct-14	12	98	Feb-15	1340
July-14	1292	Nov-14	13	00	March-15	1350

Table B

WAC Type (Tonnage)	April, May & Sept.	Jun, July, & Dec	Aug, Feb, & mar	Oct Nov, & Jan
Two Ton	20.00%	25.00%	31.00%	25.00%
One & Half Ton	19.00%	33.00%	19.00%	33.00%
One Ton	14.00%	12.00%	34.00%	26.00%
Half Ton	47.00%	30.00%	16.00%	16.00%

Performance measures are as follows:

Half Yearly Sales Performance: Oct. 14 to March 15 Average Sales

- April 14 to Sept. 14 Average Sales

April 14 to Sept 14 Average Sales

Monthly Sales Performance: Current Month Sales

- Previous Month Sales

Previous Month Sales

Sales Volatility: Maximum Monthly Sales

- Minimum Monthly Sales

Average Monthly Sales

- 71. What is the closest average number of $1\frac{1}{2}$ ton Window ACs sold by Torrent Enterprises during April 2014-March 2015?
 - A) 342
- B) 338
- C) 350
- D) 330
- **72.** The absolute difference between average annual sales (in units) of which pair of WACs type is the highest
 - A) 1 Ton and $\frac{1}{2}$ Ton

B) 1 Ton and 2 Ton

C) 2 Ton and $\frac{1}{2}$ Ton

- D) $1\frac{1}{2}$ Ton and $\frac{1}{2}$ Ton
- 73. Which type of WAC has performed the second best in Half Yearly Sales Performance?
 - A) $\frac{1}{2}$ Ton
- B) 1 Ton
- C) $1\frac{1}{2}$ Ton
- D) 2 Ton
- 74. In which of the months given below, the total WAC Monthly Sales Performance was the highest?
 - A) May 2014
- B) June 2014
- C) October 2014
- D) February 2015

- **75.** Which type of WAC has the least Sales Volatility?
 - A) $\frac{1}{2}$ Ton
- B) 1 Ton
- C) $1\frac{1}{2}$ Ton
- D) 2 Ton

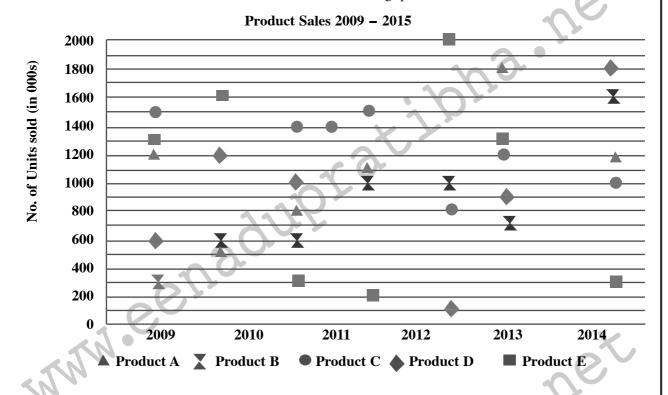

Directions (Qs. 76 to 80): Read the following information, graph and table and answer these questions.

Ellen Inc. is a Mumbai-based company which sells five products branded as A, B, C, D, and E in India. Anita looks after entire sales of North India working from regional office in Delhi. She was preparing for annual review meeting scheduled next day in Mumbai. She was attempting to analyse sales in North India for the seven-year period from 2009 to 2015. She first calculated average sales in rupees of all the five brands and constructed a table exhibiting the difference between average sales of each pair of brands as shown in the following table.

Difference between Average Sales of Products for the 7-year period 2009-15 in Rs Crores					
	Product	Product	Product	Product	Product
	A	В	C	D	E
Product A	0	14.29	-128.57	142.86	42.86
Product B		0	-342.86	-71.43	-171.43
Product C			0	-271.43	171.43
Product D				0	-100
Product E					0

Average Sales of Product A minus Average Sales of Product B

After taking a print out of the above table, she attempted to look at the trend of sales and plotted a graph in MS Excel. Later she took a print out of the graph and left for a meeting. While on her way she figured out that due to some printer cartridge problem sales of Product A in 2013, Product C in 2010, and Product D in 2012 were not visible in the graph as reproduced below. Anitha had to make some quick calculations to arrive at the information outlined in the following questions.

- **76.** What are the sales of Product A in 2013, Product C in 2010 and Product D in 2012?
 - A) Rs. 500 Crores, Rs. 800 Crores and Rs. 500 Crores.
 - B) Rs. 500 Crores, Rs. 700 Crores and Rs. 600 Crores.
 - C) Rs. 500 Crores, Rs. 800 Crores and Rs. 600 Crores.
 - D) Rs. 400 Crores, Rs. 800 Crores and Rs. 600 Crores.
- 77. Annual sales average of all products is the least in which year?
 - A) 2010
- B) 2011
- C) 2012
- D) 2013
- **78.** Which product has the least average sales for the seven-year period 2009-15?
 - A) Product A
- B) Product B
- C) Product D
- D) Product E
- **79.** The difference between average sales of products for the period 2009-15 is the least for which pair of products?
 - A) Product A and Product B

B) Product B and Product C

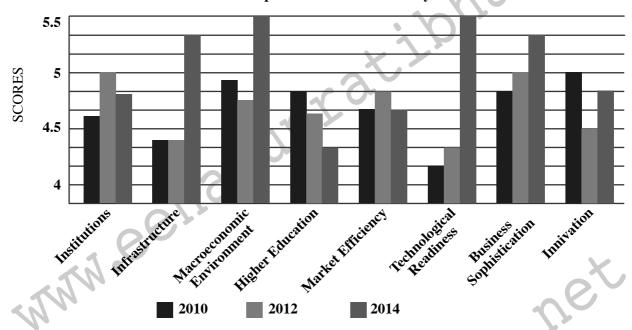

C) Product C and Product D

D) Product D and Product E

Direction (Qs. 81 to 84): Read the following information and graph, and answer these questions.

An International Organisation Produces a Competitive Index of countries every two years based on eight factors (Institutions, Infrastructure, Macroeconomic Environment, Higher Education, Market Efficiency, Technological Readiness, Business Sophistication and Innovation). the last three indices were developed in 2010,2012 and 2014. The scores for all eight factors of XYZ country are show in in the graph below:

80. If Year on Year (YoY) Growth

then the YoY growth of combined sales of all products has suffered maximum decline in which year?

- A) 2010
- B) 2011
- C) 2013
- D) 2015
- 81. If Factor performance is measured as $0.30 \times$ factor Score in $2014 + 0.35 \times$ Factor Score in $2012 + 0.35 \times$ Factor Score in 2010, then which of the following has best Factor Performance?
 - A) Innovation

B) Business Sophistication

C) Infrastructure

- D) Macroeconomic Environment
- **82.** If Factor Performance is measured as

$$\left\{ \frac{\text{Factor Score 2014} - \text{Factor Score 2012}}{\text{Factor Score 2010}} \right\}$$

then which of the following has best Factor Performance?

A) Innovation

B) Business Sophistication

C) Infrastructure

D) Macroeconomic Environment

- 83. Which of the following factors has the highest average score across indices of 2010, 2012 and 2014?
 - A) Infrastructure

B) Institutions

C) Technological Readiness

- D) Market Efficiency
- **84.** Which among the following factors had the least growth rate in 2014 versus scores of 2010?
 - A) Business Sophistication

B) Institutions

C) Technological Readiness

D) Infrastructure

Directions (Qs. 85 to 88): Read the following information and the accompanying graphs to answer these questions.

www.jay.com spent \$ 5,57,000 during last 12 months for online display advertisements, also called impressions, on five wedsites (Website A, Website B, Website C, Website D and Website E). In this arrangement, www.jay.com is the Destinations Site, and the five websites are referred to as the Ad Sites. The allocation of online display advertising expenditure is shown in Graph A. The online display advertisements helped www.jay.com to get visitors on its site. Online visitors, visiting the Ad Sites, are served display advertisements of www.jay.com and on clicking they land on the Destination Site (Graph B). Once the Destination Site, some of the visitors complete the purchase process (Graph C).

 - A) Website A
- B) Website B
- C) Website C
- D) Website E

SECTION-4

Directions (Qs. 89 to 104): Read the following passages carefully and answer the questions given at the end of each passage.

PASSAGE - 1

Because of the the critical role played by steel in economic development, the steel industry is often considered, especially by the governments, which traditionally owned it, to be an indicator of economic prowess. World production has grown exponentially, but there were big highs and equally big lows all through the 1900s and up to 2002. Recovery from the two World Wars and the Great Depression of the 1930s caused massive disruption and layoffs. Over-capacity and low steel prices continued to play havoc through the 1970s and 1980s and politicians began to lose their belief that the wealth of a nation was directly coupled to its steel production.

This led to a wave of privatisations, as state-owned enterprises shed their financial liabilities to hungry capitalists. A whole new breed of steel-makers came into being using a new technology, the mini-mill. This used a smaller electric-arcfurnace fed that just melts down 'cold' scrap. It was a cheaper process than the traditional 'hot metal integrated mills' with their mountains of ore and coal and monumental machinery, but it was used almost exclusively for lower-grade building and other 'long' products.

By the beginning of 2005, the world steel industry was on a high, after decades of moving from apocalypse to break-even and then back to apocalypse. Since 2003, when a staggering 960 million tones were produced-compared to 21.9 million tones for aluminium-there had been unprecedented demand, mainly from China and India. China was both the biggest producer, the first country to exceed 200 million tones of crude steel in a year, and also its biggest consumer at 244 million tones. The global economy was also booming, but this was creating production bottlenecks for all steel-makers and by 2004 steel had for the first time hit an

average of \$650 per tonne shipped. Profit margins were better, but where was the growth to come from? In tandem, the costs of essential raw materials for steel-making-iron ore and coking coal-had gone through the roof, along with bulk shipping costs. The key to future growth was to secure plants in emerging markets where ore and coal were close to production sites, labour costs were much lower and where technology and investment could spur greater savings.

But the central issue was that globally the industry remained a very fragmented one. No single company was producing 100 million tones a year, or 10 per cent of total world production. The name of the game was consolidation into fewer, bigger players. With this would come the chance for steel-makers to gain greater pricing power, increasing their profitability and the value of their shares.

Two groups had begun to move ahead of the pack. One was Mittal Steel with its operational headquarters in London's prestigious Berkeley Square. Mittal Steel was the world's biggest producer of 'long' products. It was young aggressive, fast, and a big risk-taker, fuelled by its founder Lakshmi Mittal's visionary zeal to consolidate the industry. It's nearest rival, Arcelor-the world's most profitable steel company, focusing on 'flat' products-was headed by the Frenchman Guy Dolle, and was a combination of there former state owned European steel plants: Arbed of Luxembourg, Usinor from France and Spain's Aceralia. These three were now merged, restructured and administered from the grandiose, chateau-like former arbed headquarters in Luxembourg's Avenue de la Libere.

Both groups were passionate about steel. Mittal, already dubbed 'the Carnegie from Calcutta', had a clearer vision of the need to streamline steel, but Arcelor was determined to become the biggest as well as the best. Dominating the market would enable either firm to increase its pricing position with customers, the car-makers, ship-builders and construction firms, as well as chasing growth in the new markets of Asia, South America and Eastern Europe.

Guy Dolle could hear the clump of Mittal's feet marching ahead, and it hurt. Arcelor was Europe's reigning steel champion and was arrogantly proud of it. It had a commanding market share of the specialised high-strength steel supplied to European car-markers and total overall production approaching 50 million tones a year, all with state-of-the-art technology. The group had repaired its consolidated balance sheet, ravished by decades of downturns and continual restructuring costs. It had invested heavily in the quest for best technology and had also acquired companies in Brazil, set up joint ventures in Russia, Japan and China and North American car market. And to its longsuffering shareholders, starved of decent dividends, Arcelor was at last moving in the right direction, after the blood, sweat and tears of shifting from public to private sector. The Luxembourg group was clearly on a wake-up call, gunning to overtake Mittal Steel and keep it at bay.

By 2005, the battle for supremacy had begun to heat up. Two projected state sell-offs by public auction, in Turkey and Ukraine, were particularly attractive commercially. Both auctions were taking place in October, within three weeks of each other. The first, in Turkey, was for the 46.3 percent of government-owned shares in Erdemir, a steel-marker producing 3.5 million tones a year for car-makers and other industrial clients in a country of seventy million people shaping up to join the European Union. Mittal and Arcelor both already owned minority stakes in the Turkish company and were eager to get majority control.

- **89.** Which of the following statements is true?
 - A) In 2003, China consumed more steel than it produced
 - B) Mittal Steel was the world's most profitable steel company in mid 2000s.
 - C) Arcelor was a bigger producer of steel than Mittal
 - D) All of the above

90. Which among the following is the common objective both Mittal and Arcelor had for aspiring to become bigger steel-markers?

a.net

- A) To consolidate the rather fragmented steel industry
- B) To facilitate privatisation initiatives of the government
- C) To have 10% of the industry share
- D) To increase pricing position with customers.
- **91.** From the above passages, it clearly emerges that
 - A) Arcleor had delivered good returns to its shareholders
 - B) Mittal Steel was Arcelor's nearest competitor.
 - C) By 2005, steel industry was in recession
 - D) A nation's steel production continues to be a good indicator of its wealth
- **92.** What are the plausible reasons for privatisation in steel industry?
 - A) slow growth in world production
 - B) Lobbying by the capitalists
 - C) Havoc played by over-capacity and falling steel prices
 - D) Introduction of the 'mini-mill'

PASSAGE - 2

In the decades the Otlet's papers had sat gathering dust, his dream of a universal knowledge of network had found a new expression across the Atlantic, where a group of engineers and computer scientists laid the groundwork for what would eventually become the Internet. Beginning during the Cold War, the United States poured money into a series of advanced research projects that would eventually lead to the creation of the technologies underpinning the present day Internet. In the 1990s, the World Wide Web appeared and quickly attracted a widespread audience, eventually establishing itself as the foundation of global knowledge - sharing network much like the one that Otlet envisioned.

Today, the emergence of that network has triggered a series of dramatic - perhaps even "axial" transformations. In 2011, the world's population generated more than 1.8 zettabytes of data, including documents, images, phone calls, and radio and television signals. More than a billion people now use Web browsers, and that number will almost certainly increase for years to come. In an era when almost anyone with a mobile phone can press a few keys to search the contents of the world's libraries, when millions of people negotiate their personal relationships via online social networks, and when institutions of all stripe find their operations disrupted by the sometimes wrenching effects of networks, it scarcely seems, like hyperbole - and has even become cliche - to suggest that the advent of the Internet ranks as an event of epochal significance.

While Otlet did not by any stretch of imagination "invent" the Internet - working as he did in an age before digital computers, magnetic storage, or packet switching networks - nonetheless his vision looks nothing short of prophetic. In Otlet's day, microfilm may have qualified as the most advanced information storage technology, and the closest thing anyone had ever seen to a database was a drawer full of index cards. Yet despite these analog limitations, he envisioned a global network of interconnected institutions that would alter the flow of information around the world, and in the process lead to profound social, cultural, and political transformations.

By today's standards, Otlet's proto-Web was a clumsy affair, relying on a patchwork system of index cards, file cabinets, telegraph machines, and a small army of clerical workers. But in his writing he looked far ahead to a future in which networks circled the globe and data could travel freely. Moreover, he imagined a wide range of expression taking shape across the network: distributed encyclopedias, virtual classrooms, three dimensional information spaces, social networks, and other forms of knowledge that anticipated the hyperlinked structure of today's Web. He saw these developments as fundamentally connected to a larger Utopian project that would bring the world closer to a state of permanent and lasting peace and toward a state collective spiritual enlightenment.

The conventional history of the Internet traces its roots through an Anglo-American lineage of early computer scientists like Charles Babbage, Ada Lovelace, and Alan Turing; networking visionaries like Vinton G.Cerf and Robert E.Kahn; as well as hypertext seers like Vennevar Bush, J.C.R. Licklider, Douglas Engelbart, Ted Nelson, and of course Tim Berners-Lee and Robert Cailliau, who in 1991 released their first version of the World Wide Web. The dominant influence of the modern computer industry has placed computer science at the centre of this story.

Nonetheless Otlet's work, grounded in an age before microchips and semiconductors, opened the door to an alternative stream of thought, one undergirding our present - day information age even though it has little to do with the history of digital computing. Well before the first Web servers started sending data packets across the Internet, a number of other early twentieth - century figures were pondering the possibility of a new, networked society: H.G.Wells, the English science fiction writer and social English science fiction writer and social activist, who dreamed of building a World Brain; Emanuel Goldberg, a Russian Jew who invented a fully functional mechanical search engine in 1930s Germany before fleeing the Nazis; Scotland's Patrick Geddes and Australia's Otto Neurath, who both explored new kinds of highly designed, propagandists museum exhibits designed to foster social change; Germany's Wilhelm Ostwald, the Noble Prize-winning chemist who aspired to build a vast new 'brain of humanity'; the sculptor Hendrik Andersen and the architect Le Corbusier, both of whom dreamed of designing a World City to house a new, one-world government with a networked information repository at its epicentre. Each shared a commitment to social transformation through the use of available technologies. They also each shared a direct connection to Paul Otlet, who seems to connect a series of major turning points in the history of the early twentieth century information age, synthesizing and incorporating their ideas along with his own, and ultimately coming tantalisingly close to building a fully integrated global information network.

- 93. What is the remark that the author of this passage considers a defensible one, rather than a hyperbole?
 - A) That the number of people who will use Internet will increase for the years to come
 - B) That the advent of the Internet is an event of epochal significance
 - C) That millions of people negotiate their personal relationships via online social networks
 - D) That more than a billion people now use web browsers
- 94. In the above passage, Otlet is being credited with
 - A) Inventing the Internet

B) Co-developing the Internet

C) Prophesising the Internet

- D) All of the above
- **95.** What has been said as the common commitment shared by the early twentieth-century figures who imagined and worked for a networked society?
 - A) Designing a World City with a networked information repository at its epicentre.
 - B) Achieving social transformation through the use of available technologies.
 - C) Building a vast new "Brain of Humanity"
 - D) Bringing world peace through online social networks

- **96.** Otlet's original idea of the network can be described as
 - A) Futuristic
- B) Visionary
- C) Utopian
- D) All of the above

PASSAGE - 3

Every loan has a lender and a borrower; both voluntarily engage in the transaction. If the loan goes bad, there is at least a prima facie case that the lender is an guilty as the borrower. In fact, since lenders are supposed to be sophisticated in risk analysis and in making judgements about a reasonable debt burden, they should perhaps bear even more culpability.

Does it make a difference if we say there is over-lending rather than over-borrowing? The difference in where we see the problem affects where we seek the solution. Is the problem more on the side of the lenders, that they are not exercising due diligence in judging who is creditworthy? Or on the borrowers, being profligate and irresponsible? If we consider the problem to be over borrowing, then we naturally think of making it more difficult for borrowers to discharge their debts; on the contrary, if the problem is over lending, we focus on strengthening incentives for lenders to exercise due diligence.

The political economy of over borrowing is easy to understand. The current borrowing government benefits and later governments have to deal with the consequences. But why have sophisticated, profit maximizing lenders so often over-lent? Lenders encourage indebtedness because it is profitable. Developing country governments are sometimes even pressured to over-borrow. There may be kickbaks in loans, or even more frequently in the projects that they finance. Even without corruption, it is easy to be influenced by Western businessmen and financiers.

They wine and dine those responsible for borrowing as they sell their loan packages, and tell them why this is a good time to borrow, why their particular package is attractive, why this is the right time to restructure debt? Countries that are not sure that borrowing is worth the risk are told how important it is to establish a credit rating: borrow even if you really don't need the money.

Excessive borrowing increases the chance of a crisis, and the costs of a crisis are borne not just by lenders but by all of society. In recent years, IMF programmes may have resulted in significant further distortions in lenders' incentives. When crisis occurred, the IMP lent money in what was called a 'bail-out' but the money was not really a bail-out for the country; it was a bail-out for Western banks. In both East Asia and Latin America, bail-outs provided money to repay foreign creditors, thus absolving creditors from having to bear the costs of their mistaken lending. In some instances, governments even assumed private liabilities, effectively socialising private risk. The creditors were left off the hook, but the IMF's money wasn't a gift, just another loan-and the developing country was left to pay the bill. In effect, the poor country's taxpayers paid for rich country's lending mistakes.

The bail-outs give rise to the famous 'moral hazard' problem. Moral hazard arises when a party does not bear all the risks associated with his action and as a result does not do everything he can to avoid risk. The term originates in the insurance literature; it was deemed immoral for an individual to take less care in preventing a fire simply because he had insurance coverage. It is of course, simply a matter of incentives: those with insurance may not set their houses on fire deliberately, but their incentive to avoid a fire is still weakened. With loans, the risk is default, with all of its consequences; lenders can reduce that risk simply by lending less. If they perceive a high likelihood of a bail-out they lend more than they otherwise would.

Lending markets are also characterised by, in the famous words of former chairman of the US Federal Reserve Alan Greenspan, 'irrational exuberance', as well as irrational pessimism. Lenders rush into a market in a mood of optimism, and rush out when the mood changes. Markets move in fads and fashions, and it is hard to resist joining the latest fad. If only one firm were affected by a mood of irrational optimism, it

would have to bear the cost of its mistake; but when large numbers share the same mood, in a fad, there are macro-economic consequences, potentially affecting everyone in the country.

- **97.** The author is trying to find the underlying cause of
 - A) Financial crisis in the economy
 - B) Underdevelopment in the developing world.
 - C) Bargaining power asymmetry between lenders and borrowers.
 - D) Inequalities in the world economy.
- **98.** The 'moral hazard' arises because
 - A) The insured takes less precaution to avoid a risk because the risk is covered by insurance
 - B) The insured takes less precaution to avoid a risk because he is unaware about the risk
 - C) The insured takes less precaution to avoid risk because he tends to benefit from the risk
 - D) The amount spent on insurance is as a waste because the risk is unlikely or minimum.
- 99. According to the author, the IMF bailouts for the countries in crisis have been in effect
 - A) The bailout for the governments of the borrowing countries.
 - B) The bailout for the banks in the borrowing country
 - C) The bailout for the lending foreign banks
 - D) The bailout for the governments of the countries of the creditors
- 100. The author believers that the cost of the crisis is ultimately borne by
 - A) The lending banks
 - B) The IMF
 - C) The tax payers of the borrowing country
 - D) The rich countries

PASSAGE - 4

The mass media have been recognized as politically significant since the advent of mass literacy and the popular press in the late nineteenth century. However, it is widely accepted that, through a combination of social and technological changes, the media have become increasingly more powerful political actors and in some respects, more deeply enmeshed in the political process. Three developments are particularly noteworthy. First, the impact of the so-called 'primary' agents of political socialization, such as the family and social class, has declined. Whereas once people acquired, in late childhood and adolescence in particular a framework of political sympathies and leanings that adult experience tended to modify or deepen, but seldom radically transformed, this has been weakened in modern society by greater social and geographical mobility and by the spread of individualist and consumerist values. Abiding political allegiances and habitual voting patterns have thus given way to more instrumental approach to politics, in which people make political choices according to a calculation of personal self-interest based on the issues and policy positions on offer. This, is turn, widens the scope for the media's political influence, as they are the principal mechanism through which information about issues and policies, and therefore political choices is presented to the public.

Second, the development of mass television audience from the 1950s onwards, and more recently the proliferation of channels and media output associated with the 'new media' has massively increased the

mass media's penetration into people's everyday lives. This means that the public now relies on the mass media more heavily than ever before; for instance television is a much more important source of news and current affairs information than political meetings; many more people watch televised sports than participate in it', and even shopping is increasingly being carried out through shopping channels and the internet.

Third, the media have become more powerful economic actors. Not only have major media corporations become more powerful global players, but also a series of mergers has tended to incorporate the formerly discrete domains of publishing, television, film, music, computer and telecommunications into a single massive 'infotainment' industry. Media business such as Microsoft, AOL-Time Warner, Disney and Rupert Murdoch's News Corporation have accumulated so much economic and market power that no government can afford to ignore them.

Few commentators doubt the media's ability to shape political attitudes and value, or at least to structure political and electoral choice by influencing public perception about the nature and importance of issues and problems, thereby. However, there is considerable debate about the political significance of this influence. A series of rival theories offer contrasting views of the media's political impact.

The pluralist model of the mass media portrays the media as an ideological market place in which wide range of political views are debated and discussed. While not rejecting the idea that the media can affect political views and sympathies, this nevertheless suggests that their impact is essentially neutral in that they reflect the balance of forces within the society at large. The pluralist view nevertheless portrays the media in strongly positive terms. In ensuring the 'informed citizenry', the mass media both enhance the quality of democracy and guarantee that government power is checked. This 'watchdog' role was classically demonstrated in the 1974 Washington Post investigation into the Watergate Scandal, which led to the resignation of Richard Nixon as US President. Some, moreover, argue that the advent of the 'new' media, and particularly the Internet, has strengthened pluralism and political

competition by giving protest groups a relatively cheap and highly effective means of disseminating information and organizing campaigns.

The dominant ideology model portrays media as a politically conservative force that is aligned to the interests of economic and social elites, and serves to promote compliance or passivity amongst the masses. The ownership ultimately determines the political and other views that the mass media disseminate, and ownerships are increasingly concentrated in the hands of a small number of global media corporations.

The elite-values model shifts attention away from the ownership of media corporations to the mechanism through which media output is controlled. This view suggests that editors, journalists and broadcasters enjoy significant professional independence, and that even the most interventionist of media moguls is able only to set a broad political agenda but not the day-to-day editorial decision-making. The media's political bias therefore reflects the values of groups that are disproportionally represented amongst its senior professionals.

The market model of the mass media differs from the other models in that it dispenses with the idea of media bias: it holds that newspaper and television reflect, rather than shape, the views of general public. This occurs because, regardless of the personal views of media owners and senior professionals, private media outlets are first and foremost businesses concerned with profit maximisation and thus with extending market share. The media therefore give people 'what they want' and cannot afford to alienate existing or potential viewers and readers by presenting political viewpoints with which they may disagree.

101.	Which of the following is the	most appropriate title	e for the passage?		
	A) Mass media and political communication				
	B) Mass media and economic development				
	C) Mass media and social dev	elopment			
	D) Mass media and cultural de	evelopment		n?	
102.	Who, according to the author,	are the primary ager	nts of political socialisation	n?	
	A) Media moguls		B) Political parties	0-	
	C) The family and social class		D) Journalists		
103.	According to the author the m	ass media is a power	ful political actor because	: :	
	A) The impact of primary age	nts of socialization h	as reduced		
	B) The technology has increase	ed the penetration of	f mass media in everyday	life
